

ANTI GRAFFITI COATINGS

Long lasting protection
against graffiti vandalism

Anti Graffiti Coatings from **Dulux Trade** deliver a complete solution to the headache of graffiti vandalism.

Anti Graffiti Coatings provide a hard wearing and decorative finish that enables quick and easy removal of graffiti vandalism and withstands rigorous and repeated washing, ideal for areas where hygiene is important. This ensures that communal areas maintain their attractive decorative finish for longer. The secret is in the durability of this water-based, two-pack epoxy system, which extends maintenance cycles and reduces the unnecessary cost of frequent redecoration.

Durable **Anti Graffiti Coatings** together with the **Remover** specifically formulated for this system, offer unbeatable performance – graffiti removal has never been easier or more cost effective.

Anti Graffiti Coatings deliver a more pleasant built environment

Anti Graffiti Coatings provide a quick and easy way to remove graffiti

Where flame retardant coatings are required use **Pyroshield™** from **Dulux Trade**.

Specifically formulated to slow the spread of flame, **Pyroshield™** is a low-hazard flame retardant system that upgrades the reaction to fire surface classification of existing internal multi-layered painted surfaces, so conforming to Legislative and 'Duty of Care' requirements.

Anti Graffiti Coatings - used where appearance is important

- Suitable for areas exposed to repeated graffiti vandalism, heavy dirt and grime
- Withstands frequent washing, steam cleaning and has excellent chemical resistance to solvent cleaning
- Ideal for areas where cleanliness and hygiene are important e.g. public buildings, communal and food preparation areas
- Low odour
- Suitable for a multitude of substrates:
 - Internal and external
 - Plaster
 - Bare concrete and blockwork
 - Sound, previously coated surfaces; brick, metal, ceramic tiles and stone
