

Dry Fall Eggshell

Reduces refurbishment costs

- *Minimises business disruption*
- *Lower labour costs*
- *Easy redecoration of suspended ceiling tiles*

Unique solution for painting commercial ceilings

- *Avoids overspray problems*
- *Full opacity in one coat*
- *Excellent adhesion*

Dulux Trade Dry Fall Eggshell

A unique solution for commercial ceiling refurbishment from Dulux Trade

Dulux Trade Dry Fall Eggshell is a high quality, waterbased mid sheen finish for fast spray application to interior ceilings and walls. It is ideal for use on large areas where spray application is the most economical application method and that must be painted with a minimum disruption of operations such as offices, retail stores, warehouses, factories, hotels and institutional buildings. It is also suited to external ceilings not subject to direct weathering such as covered carparks.

Using Dry Fall Eggshell means overspray problems can be avoided and shut down time can be minimised. Any overspray from Dulux Trade Dry Fall Eggshell dries to a dust before reaching the floor on a drop of at least 3m and is easily cleaned up with a brush.

Product	
Spreading Rate	9m ² /L
Pack Size	10L
Sheen	Mid Sheen
Application Method	For airless spray application only
Drying Time	Touch Dry : 30 minutes, Recoat : 2 hours
Dry Fall Properties	Overspray dries to a dust on falling a minimum of 3.3m (10 feet) at 25°C and 50% relative humidity.
Colour Range	White

Features and Benefits

Feature	Benefit
A cost effective alternative to replacing discoloured ceiling tiles	Saves money - costs 90% less than replacement
Spray application	Labour saving compared to roller application Reduces down time and saves money on access equipment hire Restores a factory finished appearance
Overspray dries to a dust on falling at least 3m	Lower labour costs by reducing set up and clean up time Removes inconvenience of overspray problems
One coat opacity	Saves time and money
Mid sheen finish	Good reflectance for a brighter and safer environment especially in covered carparks
Excellent adhesion to ceiling substrates and fittings	One product solution for ceiling surfaces

Case Studies

Dulux Trade Dry Fall Eggshell put through its paces

Sainsburys, Newcastle Under Lyme

When Sainsburys decided to refresh the look of the store ceiling in their Newcastle-Under-Lyme store, as part of their reinvigoration programme, Dulux Trade Dry Fall Eggshell was specified for the job.

Contract Partner, David Robinson of Robinsons Ltd, was able to demonstrate to the Sainsburys' Field Operation Managers the benefits of using Dulux Trade Dry Fall Eggshell for this refurbishment contract.

Specifying Dulux Trade Dry Fall meant spray application could be used since overspray problems are avoided. Any overspray dried to a dust and was swept up with a brush thus minimising disruption to store activities.

Sainsburys wanted to restore a factory finish appearance to the 20-year-old store ceiling. The unique product attributes of Dulux Trade Dry Fall allowed the ceiling to be redecorated rather than discoloured tiles being replaced, which reduced Sainsburys' costs.

Securicor Omega, Surrey

The ceiling of the 24 hour Securicor Omega depot in Surrey needed to be refurbished but the decoration had to take place with minimum disruption to depot operations. This product was applied by airless spray to the ceiling panels and girders without priming and allowed the redecoration project to be carried without disrupting the 24 hour delivery schedule. Any overspray that did occur was dry before it landed on the floor or vehicles and was simply swept away.

Dulux Trade Dry Fall Eggshell is the ideal solution for refurbishing commercial ceilings. The unique formulation allows ceilings to be decorated through spray application, which saves time and money, without the inconvenience of overspray problems.

Site Surveys

ICI Paints Trade Specifier Account Managers will carry out a full site inspection. This will include assessment of the current state of surface coatings, help with identification of difficult substrates and advice on extending maintenance cycles.

Specification Writing

ICI Paints offers full specification support tailored to your individual requirements. This will ensure that correct preparation is identified and the products specified are correct for the environment and substrate type.

Pre-Contract Meetings

The ICI Paints Trade Specifier Account Managers will attend pre-contract meetings where potential concerns can be highlighted and dealt with before the project starts.

Site Visits

During the course of the work, if required, site visits can be made to ensure that the work is being carried out in accordance to the specification. This can include monitoring of climatic conditions, preparation and application, as well as measuring wet and dry film thickness.

Report to project owners

A critical element of any project is minimising down time. Knowing the status of the work in progress and thus keeping control of events is equally important. The ICI Paints Trade Specifier Account Managers will ensure that Property Managers are kept informed about the status of all work in progress.

Colour Service

For larger painting projects, ICI Paints Colour Consultants can provide help and advice on colour choice using Dulux Previews, our unique colour specification software.

Health and Safety

We can help and advise on relevant health and safety issues.

The aims of Dulux Trade Contract Partnership are threefold - to focus and maintain quality, to do the job first time effectively and efficiently, thereby saving time and money, and to increase maintenance cycles and cost control. Specifiers adopting the Dulux Trade Contract Partnership scheme receive the peace of mind that the contractor has been thoroughly audited and quality assessed to selected criteria laid down by Dulux Trade to attain 'approved status'. For more details on the Dulux Trade Contract Partnership scheme please contact your local Representative or e-mail us at decr.dtcp@ici.com
